Ditat Update 01/25/21

Features added/updated:

- Added regional fuel prices, added support for regional fuel prices table and on fuel surcharge schedules.
- Updated the logic for importing advances from fuel providers.
 - If the default settings are set to neither, driver or carrier would "Deduct" - this advance will not be set to deduct if driver is not known.

Reports added/updated:

- Accident register – Added an option to view the accident type description that has been shown or to view details from the accident. If you choose accident details it will show up to the 1st 300 characters from the accident details.
 - Settlement history – Changed from Driver/Carrier to Payee with if they were driver or carrier on the report. Also updated the group by to be payee, and added options to sort the report.
-

Ditat Update 01/18/21

Features added/updated:

- HTML 5 version - fixed an issue on the carrier screen when the SaferWatch integration was not enabled.
- HTML 5 version - Customer screen – set the pre-selected "Defaults" to be the same as they were when adding new customers in Silverlight.

Reports added/updated:

- ****New Invoice Template**** Invoice total charge short – This is a version of the Invoice total report template that only has date details about the appointments.
 - ****New Report ****Auto rate log - This report will show a list of shipments that the auto rate function was run on with the corresponding results.
 - ****New Report ****Auto pay log - This report will show a list of trips that the auto pay function was run on with the corresponding results.
 - Shipment details- Added View number 7 that will show shipment details along with the Truck, trailer and driver that was used to deliver the load.
 - Driver current trip - fixed issue with drivers that were leased drivers showing on the report 2 times once as the carrier and once as the driver.
-

Ditat Update 01/11/21

Features added/updated:

- Carrier profile - added "1099 Name" field. Available in HTML only <https://ng01.ditat.net/> In Google Chrome.
-

Ditat Update 01/04/21

Reports added/updated:

- Truck Listing 2 – Added an option to group by Leasing Company.
 - Master Invoice – Added 4th view to the report that is set to be sent to Excel.
-

Ditat Update 12/27/20

Features added/updated:

- An issue with securing notes to specific groups was resolved in the HTML 5 version.
 - Notes in HTML 5 were not properly only showing for the correct users when a note was secured to a group this issue was resolved.
- Quik Q advances additional driver lookup by last 6 digits of fuel card number specified on Driver profile.
- Samsara - reefer integration trailer lookup/match changed to use Device, just like trailer GPS tracking
- Truck profile - added new lease-specific fields (HTML only)

Reports added/updated:

- Booking performance -Added option to group by Equipment type and Equipment type + Hazmat. These groups will show loads each dispatcher booked by equipment type.
 - Empty miles report – Fixed issue with State on delivery location showing the same as the Pickup on out of state loads.
 - Truck listing 2 – Added an option to group by Leasing company.
-

Ditat Update 12/07/20

Features added/updated:

- Zones, added an option to allow zones to be built by "Location".
 - You can now build Zones based on locations, this will allow you to create zones for your yard, or common pickup/delivery locations. These zones can then be used on the planning and dispatch boards.
- Suggested Unloaded Origin Fix – system will now show all currently assigned trips, not just one.

Reports added/updated:

- Shipment details – Added options to group by pickup or delivery zone.
 - Settlement no miles – Added the settlement batch number to show below Settlement number on this settlement template.
-

Ditat Update 11/30/20

Features added/updated:

- Pending Check calls - when a driver types in "bt" or "bobtail" the system will recognize this and correctly display Bobtail on the pending check call screen.
- Added option in the Accounting Company options to use the "Carrier invoice as vendor bill number" if this box is checked then the system will create vendor bills using the Carrier Invoice ID instead of the Ditat Trip number.

Reports added/updated:

- Insurance policies list – Added parameter to run for not active trucks, trailers or Drivers.

- Margin details – Added options to group by pickup or delivery zone.
-

Ditat Update 11/15/20

Features added/updated:

- Moved Accident Id to the second column to make this easier to find claims by accident.

Reports added/updated:

- Driver last trip – Fixed issue where the report would not show when the driver was the second seat driver on the load.
 - Master Invoice – Added a second view combining all invoices for a date range per customer to one report.
 - Settlement with Ref1 – Added a new Settlement template that can be used that will show Reference number 1 from the Shipment on the driver's settlement.
-

Ditat Update 11/09/20

Features added/updated:

- Accounting company mapping FIX (relates to HTML UI)
 - Fixed issue that would create duplicate lines in the database under certain situations.
- UI For trailer on pending check call screen improvements
 - If the location is a drop and hook the driver will be required to send a trailer in on the check call, updated the screen to show the trailer number so it is easier to read.

Reports added/updated:

- Empty miles – Updated to show loads that were not showing.
 - Shipment audit – Fixed issue with showing blank statuses when canceling a load.
-

Ditat Update 11/01/20

Features added/updated:

- Rate Plans: Short Ton calculation rate type added
- KeepTruckin: Issue with GPS tracking fix (when multiple duplicate devices configured)
- Trailer sent by a driver from Mobile Dispatch will be shown on the Pending check call screen.
- PDF Component update: some documents were attached as blank (Fix)
- HTML Reporting: custom group selector (Fix)

Reports added/updated:

- AP Settlements for export
- Empty mile report
- Shipment audit details
